

PBR1-D

Dome-Top Illuminating Bollard

DESCRIPTION

The PBR1-D illuminating bollard is an economical versatile dome-top bollard ideal for retail centers, business parks, schools, transit centers, and medical facilities. Two optical distributions combined with a glass lens, white or silver cone reflector, or louvers achieve the desired coverage of areas while a choice of lumen packages and color temperatures ensure the right solution for a wide variety of applications. Options include GFCI outlet, fusing, surge protection, shielding, emergency battery backup, and microwave motion sensors. Lumen output is equivalent to 70W metal halide.
